DETAILED ACTION

The following action is in response to the Appeal Brief filed for application 10/579,183 on April 17, 2009.

Allowable Subject Matter

Claims 1-2, and 4-10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the continuously variable transmission as claimed, and particularly wherein a generatrix of a curved rolling contact surface of the races and the planets is non-circular and in which the curved rolling contact surface of the races and the planets is a volute, involute or evolute curve, and including the remaining structure of claim 1. Although Milner '256 specifically teaches the same planet surface, the specific teaching of a non-circular generatrix for the race is not disclosed. Milner '256 teaches of a "matching" race that is matched with the planet, however, this is only disclosed as a matching convex or concave surface, but the generatrix itself is never disclosed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roger L. Pang whose telephone number is 571-272-7096. The examiner can normally be reached on 5:30am to 4:00pm.
